PROFILE

Having a knack for deconstructing and simplifying problems has helped me in many areas. It has served me well in refining solutions, communicating and teaching others. Being aware of my strengths and weaknesses is very important to me, I believe knowing yourself plays a key role in personal and professional development.

Currently my strengths reside in **UI / UX** and **front end development**. Over the past year I have spent a lot of my time expanding my abilities with **ES6**, **REACT** and **Node.js**. My goals are to be able to take my design background and accompany it with a solid ability to program. I have used these languages in a handful of side projects. I have acquired a favorable understanding of these skills by doing side projects and online courses.

SKILLS

HTML / JADE

CSS / SASS

JS / JQUERY

GULP / GRUNT

JEKYLL

COMMAND LINE / GIT / GITHUB

WORDPRESS

ADOBE CREATIVE SUITE
